

MEN Water Supply Corporation
Boil Water Notice Rescinded
February 23, 2021

On February 15, 2021, the Texas Commission on Environmental Quality required the MEN Water Supply Corporation public water system, PWC 1750015, to issue a Boil Water Notice to inform customers, individuals, or employees that due to conditions which occurred recently in the public water system, the water from this public water system was required to be boiled prior to use for drinking water or human consumption purposes.

The public water system has taken the necessary corrective actions to restore the quality of the water distributed by this public water system used for drinking water or human consumption purposes and has provided TCEQ with laboratory test results that indicate that the water no longer requires boiling prior to use as of 4:00 PM February 23, 2021.

If you have questions concerning this matter, you may contact Dennis Donoho at 903-872-1899. Please Note: The required minimum pressures from our supplier did not allow us to return to required minimum pressures system wide until early morning February 22, 2021. It takes 24/30 hours to receive lab test results which were submitted on 2/22/21.
